

VARIAN® MASS SLIT for Implanters

The **VARIAN®** Mass Slit is a component for **VIISion®** and **VIISta®** implant equipment. **Mass Slit** feedthrough system enables vacuum seal under rotation by keeping high vacuum conditions.

As the leading service supplier for all rotary feedthroughs and motor spindle assemblies used for high vacuum environments, Global Technologies is providing a unique and complete service level of repair for all VARIAN® Mass Slits.

To minimize production downtime, Global Technologies proposes exchange options with fully renewed systems under short notice.

VARIAN®		
PRODUCT REFERENCES		
EQUIPMENT	Right Hand	Left Hand
VIISion®	E19003080	E19003081
VIISta®	E19284870	E19284880
	E19009250	E19009260

VARIAN® Mass Slits are fully inspected, repaired and tested to OEM specifications

I ncoming Inspection

- Vacuum test
- Mechanical control
- Water circuit cooling test
- Inspection report

R epair Process

- Disassembly
- Decontamination
- Cleaning (DI)
- All new consumables (O-ring, bearings, Ferrofluid, poles, ...)
- Replacement of parts damaged or out of specification
- (100% multistep control)*

F inal Control

- Vacuum test and spin test
- Water circuit cooling test
- External cleaning
- Final Inspection
- Maintenance Report
